Subject: Offer of a long long-term collaboration and a position of Visiting Scientist at the Regional Centre of Advanced Technologies and Materials at Palacky University in Olomouc

Dear Professor Albanis,

I turn to you with an offer of the long-term collaboration between Palacky University in Olomouc and University of Ioannina. Our university has succeeded in the competition of many others academic institutes in the Czech Republic and the best research teams from our university have been supported by the Structural Funds of the EU, in the framework of the Operational Program Research and Development for Innovations.

One of the newly established research centers at Palacky University is the Regional Centre of Advanced Technologies and Materials (www.rcptm.com). The Centre focuses predominantly on research and development of nanomaterials and their applications in biotechnologies, medicine and environmental technologies. The RCPTM has an ambition to act as the European Centre of nanomaterials research. The Centre collaborates on a long term basis with the leading worldwide institutes and the one of main goals of the Centre is to promote existing relations towards excellent research and support the commercial application of the results. Thus, the sustainability and internationalization of RCPTM is one of the long-term priorities of Palacky University in Olomouc.

The Laboratory of Materials Physics- Mössbauer spectroscopy of Physics Department employees collaborate on a long term basis with the RCPTM research teams, as shown by the number of publications in prestigious journals. We would like to take this opportunity to strengthen existing collaboration through regular visits of the researchers of the Materials Physics Laboratory in Olomouc and the RCPTM researchers at University of Ioannina. These activities will be covered by Palacky University in Olomouc. Moreover, we would like to offer the prestigious position of Visiting Scientist to Prof. T. Bakas, Dr. A. Bourlinos and Dr. A. Douvalis from Physics Department of your university, who significantly contribute to the results of joint research. This position is reserved for top scientists of the world's leading laboratories (EPFL Lausanne, University of Tokyo, Florida Institute of Technology etc.; <http://www.rcptm.com/visiting-scientists>), who are expected to transfer their scientific experience through the regular lectures (max. twice a year), especially to post-gradual students and scientists at the position of Junior Researcher in the RCPTM workplace. The Visiting Scientists should also act as the guarantee of scientific work during the exchange stays. This position would be related to the symbolic salary and the covering of all travel expenses.

Dear Professor Albanis, I would like to ask you for formal consent to a long-term collaboration between our universities including the exchange stays of our employees. Simultaneously, I would like to ask you for your consent to offer the position of Visiting Scientist to your scientists. I believe that these steps will result in further intensification of the scientific relations between Palacky the University and University of Ioannina.

Thank you very much for your cooperation,

Yours Sincerely

Prof. Miroslav Mašláň
Rector of Palacky University in Olomouc
Křížkovského 8
771 47, Olomouc
Czech Republic
